RECENT EXPERIENCE

ExecVision

Senior Engineer | October 2017 - April 2020

- Used React to build several key features in ExecVison's consumer facing conversation intelligence platform.
- Created "Inbox", a key feature within ExecVision's consumer facing product that allowed for a place for users to receive all notifications within the app, resulting in a 25% increase in overall team activity
- Created an centralized area where reps and managers could see a summary of their activity, using D3 for data visualization
- Ensured that a consistent style was followed within the app and that a set of reusable components was used to support that consistency
- Built all components to be fully responsive with mobile always kept in mind
- Drove daily PR process, giving active feedback to other engineers
- Developed an admin section of the application where users could customize the software to meet the specific demands of their business.

iLoan / OneMain Financial

Senior Engineer | April 2017 - October 2017

- Worked heavily within iLoan's consumer facing application used for applying for and managing existing loans, building out several important features using React.
- Used Ember to add numerous enhancements to Monocle, iLoan's internal facing management application
- Ensured all code developed was well covered by a comprehensive test suite

Tastyworks / dough, Inc.

Senior Developer | October 2014 - March 2017

- Developed features for Dough, a rich stock and option trading platform, on web, android, and iOS
- Built out backend infrustructure in Ruby and Elixir to prepare for the launch of the TastyWorks brokerage firm
- Developed a java library that was transpiled to work on iOS, Android, and Desktop improving developer productivity up to 30%
- Assisted and mentored junior developers

Sears Holdings

Senior Javascript Developer | 2013 - 2014

- Lead Developer for Tasker Bee, an internal email campaign development tracker later white labeled and marketed to third parties

ABOUT ME

Software developer with over 10 years experience in building rich and interactive web sites and mobile apps. Experienced with Javascript front end frameworks, backend server development, 3rd party API integration, and REST.

Passionate about producing clean, consistently designed user interfaces built using cutting edge technology, with a focus on staying pragmatic in practice. Striving for perfection but always keeping business goals in mind.

Strengths include self-motiviation, excellent interpersonal skills, and demonstrated ability to deliver mission critical results.
